Attachments: SEW_paraquat work flow proposal for Westat_V2.docx

Hi Stacy and David,

A few suggested edits I added, see attached. Thanks again Stacy for drafting this.

Subject: Proposed paraquat statement of work

David and Ashlee,

The attached document follows the wording, level of detail, and document format of the Appalachian mining example provided by Edward Hudgens (also attached).

As we discussed in our meeting this morning, the paraquat work flow proposal can be compared to Carol's chlorpyrifos example (also attached), and additions can be added to the deliverables given our needs and money constraints.
